

Azure DevOps Jumpstart

People. Process. Products.

DevOps is the union of people, process, and products to enable continuous delivery of value to the end users. There is a shift toward Cloud, Agile, and DevOps. As modern systems are becoming increasingly complex, Hanu DevOps CoE gives the advantage of the necessary people skill-sets, processes and tools for smooth digital transformation.

Hanu DevOps CoE has three packaged offerings that can kickstart your DevOps journey using Microsoft's Azure Cloud Adoption Framework. This engagement will be focused tailored according to your organizational requirements and respective product development needs:

DevOps Assessment

- Strategies for reducing overall build time (parallel run of tasks, multiple pipelines).
- Best practices for publishing Artifact feeds.

DevOps Assessment, Strategy & Roadmap

- Strategy, and roadmap based on your ambitions, priorities, and organizational capabilities.
- Prioritize the recommendations from the assessment and produce a 60-90 days roll-out plan.

DevOps Jumpstart

- Lay the foundation of existing customer requirements with MVP (Minimum Viable Product) using the strategic assessment, roadmap, and plan as a guide.
- Set up Azure DevOps accounts and an initial DevOps project to establish an experimental work area.

DevOps Benefits

208x More
Frequent Code Deployments

106x Faster
Lead Time From Commit to Deploy

2604x Faster
Time to Recover From Incidents

7x Lower
Change Failure Rate
(Changes are 1/t as Likely to Fail)

Final Deliverables

- Documented assessment, strategy, and Azure DevOps adoption roadmap.
- List of recommendations as to what needs to be done to modernize your DevOps practice using Azure DevOps Skills readiness plan.
- Presence on Azure DevOps.
- Working set of DevOps artifacts, repositories, and pipelines that can be used as a template for further projects.
